Phase 1 - Brainstorming & Ideation Phase

Student Enrollment and Course Management System on Salesforce

Project Idea

- To digitize the college admission and course allocation process using Salesforce.

Problem Statement

- Currently colleges use manual registers, no proper course seat tracking.
- Fee payment is not tracked.
- and data gets duplicated.

Objectives

- Automate enrollment
- Manage courses centrally
- Track student progress
- Have all data in one secure system.

Target Users

- Students to enroll and view grades
- Faculty to manage courses and give grades
- Admin to control the whole system

STUDENT ENROLLMENT & COURSE MANAGEMENT SYSTEM

ACADEMIC YEAR 2026–2027

Phase 1 — Brainstorming & Ideation Phase | PAGE 1 of 2

PROJECT IDEA

Detailed digitization of admission process using Salesforce CRM.

- **Cloud-based solution** scalable, accessible from anywhere
- **Reduces paperwork** through digital forms & automated workflows
- **Central database** for students, courses, enrollments & payments

PROBLEM STATEMENT

Current manual processes create critical bottlenecks:

- **Manual registers cause errors** & inconsistencies in student data
- **No real-time seat tracking** leads to over-enrollment in courses
- **Fee payment tracking** is difficult & lacks transparency
- **Data duplication and loss** due to scattered paper records
- No analytics to support decision-making or reporting

OBJECTIVES

Key goals for Phase 1 implementation:

- **Automate enrollment with online forms** self-service portal for admissions
- **Manage courses centrally with capacity** monitor seats, schedules, prerequisites
- **Track student progress with grades & attendance** holistic student view
- **Secure system with role-based access** admins, faculty, admissions staff
- **Real-time reporting & dashboards for** enrollment insights

PHASE 1 FOCUS: Stakeholder Workshops • Requirements Gathering • Process Mapping
Salesforce CRM Architecture Planning

Phase 1 — Brainstorming & Ideation Phase

Student Enrollment and Course Management System on Salesforce | Academic Year 2026–2027

TARGET USERS — DEEP DIVE

Students
- Role: **Prospective & Enrolled Learner**
- Permissions: View courses, register, pay fees, track progress, access grades

Faculty
- Role: **Course Instructior & Evaluator**
- Permissions: Create course listings, manage roster, input grades, monitor attendance,

Admin
- Role: **System Administrator / Registrar**
- Permissions: Full system access, configure workflows, manage users, approve enrollments, generate reports

KEY FEATURES LIST

Online Registration
Self-service portal for course enrollment

Seat Management
Real-time seat availability & waitlist automation

Fee Tracking
Payment monitoring, invoices, fee balance dashboard

Dashboard & Reporting
Custom dashboards for enrollment trends & performance

STAKEHOLDER ANALYSIS

Primary: Students
Needs: Simple registration, transparent fees, mobile access

Internal: Faculty
Needs: Easy course setup, grading tools, real-time roster

Leadership/Admin
Needs: Data visibility, compliance, reporting, cost efficiency

EXPECTED OUTCOMES — AUTOMATION

- Automated approval workflows replacing manual paperwork
- Automated notifications for enrollment confirmations & fee reminders
- Real-time data sync between departments, reducing silos

SUCCESS METRICS

Reduced Enrollment Time
Target: 60% faster processing — from 2 weeks to <5 days

Error Reduction
Target: 75% fewer data entry errors via validation & automations

FUTURE SCOPE

AI Recommendations
Personalized course suggestions based on student history & performance

Mobile App
Student/Faculty mobile app for on-the-go access & push notifications

WHY SALESFORCE — PLATFORM ADVANTAGES

Cloud
Scalable, 99.9% uptime, no infrastructure needed

Security
Role-based access, data encryption, compliance (FERPA ready)

Scalability
Handles growing student volume, multi-campus ready

Flow + Apex
Low-code automation via Flow; Custom logic via Apex for complex rules
